## Risk Assessment COVID10

Work Area/Activity/: Cleaning Procedures

**Location: NCB/NCD/NCP** 

Covid19 - All NCLT staff are operating within social distancing instructions and implemented measures in terms of site working, contractor site visits and cleaning regimes. All relevant PPE equipment and washing, cleaning facilities are in place will be available at all times within the college.

Risk [R] = Likelihood [L] x Impact [I]

Likelihood	1 Rare	2 Unlikely	3 Possible	4 Likely	5 Almost certain	Impact	1 Insignificant [Scratch, bruise]	2 Minor [First-aid]	_	3 derate I treatment]	4 Major [Broken bones, serious injury, disease]	5 Severe [Death, permanent loss]
Risk 1 - 4	•	in Controls]	Risk 9	_	<b>ledium</b> Consider Im	proving]	Risk 10 - 15	High [Seek to Ir	nprove]	Risk 16 25	- Critical [Stop / Actions R	equired]
Who could		Students	Contr	actors	Visi	tors /	Young p	ersons	Drognan	t women	Persons with i	mnairmonts
Employees	,	Students	Contr	actors	Pub	lic	(Under 18)		rregnan	t women	reisons with i	inpairments

Significant Hazards & Hazardous Event	Risk before controls		е	Existing Measures to Control Risk		Residual Risk		Any Additional Controls
	L	I	R		L	ı	R	
Spread of Covid-19 Coronavirus	2	4	8	Hand Washing Hand washing facilities with soap and water in place.  •Stringent hand washing taking place.  •Hand washing guidance signage  •Drying of hands with disposable paper towels.  •Gel sanitisers in any area where washing facilities not readily available	2	2	4	All staff and students to be reminded on a regular basis and have the opportunity to wash their hands for 20 seconds with water and soap or 70% alcohol hand sanitiser. Also reminders both verbally and through signage

	to catch coughs and sneezes in tissues – Follow Catch it, Bin it, kill it and to avoid touching face, eyes, nose or mouth with unclean hands. Tissues will be made available throughout the college
Cleaning Alongside a deep clean prior to opening the college and subsequent daily cleaning regimes in place additional cleaning staff will frequently be cleaning and disinfecting objects and surfaces that are touched regularly particularly in areas of high use such as door handles, light switches, reception area using appropriate cleaning products and methods.	Rigorous checks will be carried out by line managers to ensure that the necessary procedures are being followed.
Social Distancing Social Distancing - Reducing the number of persons in any work area to comply with the 2-metre (6.5 foot) gap recommended by the Public Health Agency	Staff to be regularly reminded of the importance of social distancing both in the workplace and outside of it.  Management checks to ensure this is adhered to.
Work Patterns Identify staff who could work from home and encourage home working to minimise numbers on site. There are a number of roles where this will not be practical.  Redesigning processes to ensure social distancing in place.	

Г		
	Calls, emails to be used instead of face to face meetings	
	wherever practicable. Ensuring sufficient rest breaks for	
	staff.	
	Social distancing also to be adhered to in canteen area.	
	Removal of smoking areas from NCP to reduce potential	
	for interacting at distances less than 2m.	
	Wearing of Gloves	
	Where Risk Assessment identifies wearing of gloves as a	Staff to be reminded that wearing

Likelihood categories				
Rare	Unlikely	Possible	Likely	Almost Certain
This will probably never happen/recur.	Do not expect it to happen/recur but it is possible it may do so.	Might happen or recur occasionally.	Will probably happen/recur but is not a persisting issue.	Will undoubtedly happen/recur, possibly frequently.

Impact categories				
Insignificant	Minor	Moderate	Major	Severe
Minimal injury requiring no/minimal intervention or treatment. No time off work.	Minor injury or illness, requiring minor intervention (First Aid / GP). Requiring time off work for >3 days.	Moderate injury, incapacity/disability requiring medical / hospital intervention. Requiring time off work >7 days. RIDDOR reportable incident.	Major injury leading to long-term incapacity / disability. Requiring time of work for >14 days.	Incident leading to death. Multiple permanent injuries or irreversible health effects.

## Risk Matrix [Likelihood x Impact]

Likelihood Impact	Rare [1]	Unlikely [2]	Possible [3]	Likely [4]	Almost Certain [5]
Severe [5]	5	10	15	20	25
Major [4]	4	8	12	16	20
Moderate [3]	3	6	9	12	15
Minor [2]	2	4	6	8	10
Insignificant [1]	1	2	3	4	5

Risk Level	Action and Time-Scale
Low	No further preventative action is necessary, but consideration should be given to more cost-effective solutions or
	improvements. Monitoring is required to ensure controls are maintained.

Medium	Efforts should be made to reduce the risk, but the costs of prevention should carefully measured and limited. Risk reduction measures should be implemented within 3 to 6 months, depending on the number of people exposed to the hazard.
High	If an extremely harmful situation may arise, even if unlikely, a specific re-evaluation of the task should be undertaken to establish more stringent controls. Work should be monitored closely until the risk has been significantly reduced, in a short period of time.
Critical	Work should not be started or continued until the risk level has been reduced. While the control measures selected should be cost-effective, legally there is an absolute duty to reduce risk. This means that if it is not possible to reduce the risk even with unlimited resources, then work must not start.
